## Create your own world

*Cyprus : October 2014-September 2015*

### WHAT?

"Create your own world"'s mission is to organise different leisure time activities for young people, in order to help them find different creative ways to spend their free time. At the same time our aim is to help them learn some new things, such as speaking a new language, as well as developing a new skill, such as dancing and playing a musical instrument.

One of our goals will be to help them be more active citizens, by organising different events for the society and promoting volunteerism. A lot of young people in Cyprus are at the moment unemployed and quite frustrated because they do not feel that they are productive in any way. There are also a lot of young people that may be asylum seekers, political refugees or even human trafficking victims. These young people do not have the same opportunities as others, especially because they are not really implemented in the society. A lot of them do not have friends or hobbies and in many cases, not even some creative ways to spend their days or learn something. Our goal is to promote the inclusion of these young people to the society and help them find ways to use their energy in a creative way. We will also organise events that will show them the opportunities they have abroad and how they can travel and at the same time learn new things.

Through different actions, including non formal education and a variety of other tools, such as Human Library or Theatre of the Oppressed, we will try to make people understand that they have different ways to be productive and creative. The volunteers will get lots of versatile experience from youth work and will gain lots of knowledge about leading different kinds of youth groups. We will give them the opportunity to plan activities and be part of developing old ones. They will also learn about youth information and about different kinds of office work like reporting and planning. Volunteers will have the chance to participate in the diffusion of youth mobility programmes,
